Dear Parents / Guardians

Along with efforts made by teachers, cooperation of parents is also very important for academic excellence of children. We hope that you will continue to support us in this regard.

Encourage Your Children!

In order for the children to become the best members of Islamic society, good upbringing is very necessary. One of the ways of good upbringing is appreciating the children when they do something good. Appreciating them on good work can positively impact on their performance. Teachers and parents should appreciate good work of their children so that the children can become more self-confident and succeed in their academic career.
