

We are delighted to share our first monthly newsletter. This edition highlights a range of classroom activities, including **Radiation and Transfer of Heat** in Physics, **Model Footbridge Construction** in Primary Science, microscopic study of the **Structure of Stomata**, an introduction to **Wave Motion**, and **Robotics** classes where students explored basic programming and engineering concepts. Students also practised organising data using **Tables and Chart Graphs** during their ICT lessons in MS Excel.

In co-curricular activities, students from various campuses participated in **Educational Trips**, and a number of **Sports Activities** were also held across our campuses.

Alongside academics, students engaged with four **Weekly Tarbiyah Themes**: Sympathy, Obedience to Parents, Love for the Quran, and the Importance of Discipline.
