PRE-PRIMARY-DECEMBER-2025

Winter Celebration

Our Winter Celebration brought the season to life through a creative and hands-on learning experience. Students designed a winter-themed environment, complete with a cozy fireplace, snowfall effects, and displays of dry fruits. The activity encouraged creativity, sensory exploration, and seasonal awareness while allowing children to express their ideas through art and play. It was a joyful way to connect learning with real-life experiences and celebrate the winter season together.

Professions Day

On Professions Day, our students explored the world of careers by role-playing different professions in the classroom. Dressed as doctors, teachers, engineers, laborers, and more, they learned about various jobs and the responsibilities that come with them. The activity encouraged imagination, social interaction, and a better understanding of the working world in a fun and engaging way.

Transport Exhibition

Students participated in a Transport Exhibition showcasing land, air, and water transport. They created different models of vehicles and displayed their routes, helping them understand modes of transport and how they are used. The activity promoted creativity, basic concepts of transportation, and hands-on learning.

PRE-PRIMARY-DECEMBER-2025

Fruit Salad Activity

Our pre-primary students at the Sindh campuses enjoyed a fun, hands-on Fruit Salad Activity that provided a rich, multi-sensory learning experience. Children learned the names, colours, shapes, and textures of different fruits while developing fine motor skills, teamwork, and an understanding of healthy eating.

Vegetable Sandwich Making

Butter, Knife, Pan, Apron, Cut, Slice
Cucumber, Tomato, Carrot, Lettuce

Our pre-primary students participated in a Vegetable Sandwich Making Activity, where they learned to identify different vegetables and basic kitchen tools. This hands-on experience encouraged them to smell and taste fresh vegetables, fostering a positive attitude towards healthy eating.

Seed Germination Activity

The Seed Germination Activity is part of our pre-primary curriculum, designed to bring children closer to nature while enhancing their observation skills, patience, and curiosity as they watch seeds sprout and grow into plants. It also fosters responsibility, as each child cares for their own seed.
