

MONTHLY NEWSLETTER

PRE-PRIMARY-FEBRUARY 2026

Welcoming Ramadan

This month, our special activity was **Welcoming Ramadan**, aimed at guiding students in embracing the spiritual essence of the holy month. Through engaging lessons on fasting, prayers, and Quran recitation, students deepened their understanding of Ramadan and strengthened their connection with Allah Almighty, nurturing mindfulness, devotion, and spiritual growth from an early age.

Counters & Cards Activity

Early **number sense** is key to building strong math skills. Our ECCE program uses fun activities to support this, including the **Counters & Cards** activity. In the month of February, students learned to identify numbers and classify them as **odd or even** by pairing and grouping objects, strengthening their **foundational math concepts**.

Movable Alphabets Activity

Our students also enjoyed the **Movable Alphabets** activity, which helps students build a strong foundation in early literacy. Through this activity, students recognised and named different letters and practised arranging them to form simple words, which enhanced their **letter recognition**, **word-building ability**, and early **reading skills**.

Miscellaneous Activities

Apart from the above-mentioned activities, our little learners, in the month of February, explored, discovered, and had fun through a variety of engaging experiences! From **shape recognition** and **size discrimination** to **EPL exercises** and **number memory games**, each activity was designed to build foundational skills in early literacy and numeracy, refine visual discrimination, develop motor skills and hand-eye coordination, sharpen cognitive abilities, and foster curiosity.
